About Us

AGRICULTURE

Sura Agriculture is located in the perfect area for growing fruits. The rich soil and ideal climate in Namangan region help us produce consistent, high-quality crops. Additionally, our continual investment in equipment and cold chain facilities, coupled with the development of new varieties, we can deliver freshness throughout the season.

THE PROSPECT OF OPERTUNITIES

Speaking about the acclaimed changes taking place in the country over the past five years, in particular, it should be noted that the people of Namangan region see the results of these reforms in their lives, and the main principle set by President Shavkat Mirziyoyev - that the consent of the people is increasing day by day.

Our people and the world community acknowledge the correctness of the investment policy in the development of modern Uzbekistan. Investments in production, education and other spheres of society can be compared to a real "engines" of development. In particular, the promising large-scale work carried out in this direction in Namangan region is aimed at implementation of projects, and it is clearly seen that it will serve as a driver of rapid changes.

This can be seen in the following figures and facts reflected in the reports of last year: in 2020, 871.4 mln. USD in foreign trade turnover was accomplished with 47 foreign countries. Of this, the volume of exports amounted to 378.1 mln. USD (an increase to 22 mln. USD which is 106.2% compared in 2019), the volume of imports amounted to 493.3 mln. USD (a decrease to 137 mln. USD compared to 2019, which is 78.3%). It is worth noting that the global pandemic, which has hit many countries economically, has not prevented the implementation of projects in the area of industry and production in our country, including in Namangan region.

In 2021 it is planned to make 1073.0 mln. USD foreign trade turnover with 55 foreign countries. In particular, 533.0 mln. USD in export and 540.0 USD import operations are envisaged.

186 4-5/2021 «Uzbekiston Iqtisodiy Axborotnoma» - Jomhuriyatimizning Yulfozasi

It should be noted that the UAE has a special place in international economic cooperation in our region. This is evidenced by the fact that the foreign trade turnover with this country in 2020 amounted to 1,252 thousand USD, of which 687.0 thousand USDs were export and 565.0 thousand USD were import operations. Our world-famous fruits and vegetables were exported to the United Arab Emirates, while cars and other industrial and agricultural products were imported.

In recent years, bilateral trade between the UAE and Namangan region and investment relations with representatives of major companies of the Emirates have been steadily developing. It is no exaggeration to say that the investment project implemented by the UAE company "SURA HOLDING LLC" for construction of an intensive garden in the region is one of our promising steps in this area. According to the agreement signed on this project, more than 100 hectares of land were allocated in Yangikurgan district. FE in the form LLC "SURA GENERAL INVESTMENTS" fenced off the land plots for intensive gardening, made them ready for planting and even installed drip irrigation equipment on Turkish technology. 49,000 cherries, 14.5 thousand peaches, 12.2 thousand apricots and 7.3 thousand plum seedlings were imported from Italy for intensive gardening.

on December 10, 2020 with the Namangan regional administration and the Emirati "RG-General Trading FZE" on production project "Mineral Water" worth 5 million USD. Implementation of this project is scheduled for 2020-

...bilateral trade between the UAE and Namangan region and investment relations with representatives of major companies of the Emirates have been steadily developing

Under this project, 3.0 mln. USD of foreign direct investment was disbursed, 40 new jobs were created and the project was commissioned on time. Currently, research is underway to further expand the scope of the project by allocating additional 358 hectares of land.

Measures are also being taken to implement the memorandum signed 2022, and the project will create 50 jobs. These are just the beginning, of course. The wide potential of our region - natural and social resources, favorable investment climate, prudent measures to support entrepreneurship will allow us to implement more promising and modern projects on the basis of mutual interest with our foreign partners, including UAE investors.

Our Product

1. Cherries
2. Apricots
3. Nectarines
4. Plums
5. Peaches

CHERRIES

GIANT RED

FRUIT

Very large size (up to 38 mm), rounded, vermilion red colour, circular shape, colorful red color

RIPENING TIME

30 MAY/5 JUNE

FEATURES

This cherry is very interesting due to its exceptional standards and its attractive appearance and good relationship

SKEENA

FRUIT

Kidney-shaped, good size (26/30 mm). Good hold on the plants skin color is bright-intense red.

Its flesh has a dark red color

MATURATION

+2 DAYS / JUNE (+30 BURLAT)

FEATURES

High resistance to rain cracking. Even in very bad weather with heavy rainfall.

Excellent taste qualities. Very interesting choice for regular production

KORDIA

FRUIT

Good size considering the harvest date, bright to dark red skin, very firm flesh, crisp, holds well on the tree, excellent flavour.

Susceptibility to cracking: low.

RIPENING TIME

15/25 JUNE(+24 BURLAT)

FEATURES

valuable medium-late variety, consistent producer of attractive, flavourful, high quality fruit with good post-harvest life

LAPINS

FRUIT

Large size, bright red skin, flesh of medium firmness, good flavour.

Susceptibility to cracking: high.

RIPENING TIME

+24 BURLAT

FEATURES

Very productive late variety with fruit of good quality size requires use of covering films to prevent cracking, and root stocks of medium-high vigour

REGINA

FRUIT

Medium-large, bright red skin, pulp of medium firmness, good flavour.

Susceptibility to cracking: very low.

RIPENING TIME

LATE (+30 BURLAT)

FEATURES

Late variety, of interest when grafted on weak rootstocks that encourage early bearing and improve the organoleptic characteristics of the fruit.

SWEET HEART

FRUIT

Large size, intense bright red skin, very firm flesh, juicy, good flavour.

Susceptibility to cracking: very low.

RIPENING TIME

+35 BURLAT

FEATURES

Late variety of interest when grafted on weak rootstocks that can promote early bearing and improve the organoleptic quality of the fruit.

SATIN

FRUIT

Medium-large size, bright red skin, firm pink flesh, good flavour, juicy.

Susceptibility to cracking: low

RIPENING TIME

+2/3 DAYS SUMMIT(+30 BURLAT)

FEATURES

Very productive variety with good fruit size and quality best performance when grafted on vigorous rootstocks as dwarfing stocks tend to decrease fruit size.

APRICOTS

FARABELA

FRUIT

Good size, juicy, aromatic, bright orange colour, oval shape, 12 brix

RIPENING TIME

FEATURES

LADY COT

FRUIT

Shape is oval-round and size is big. Bright orange with a nice red blush on 30 to 50% of fruit area. Good firmness and cracking resistance.

RIPENING TIME

1/7/JULY

FEATURES

Attractive fruit with excellent taste qualities

SUNNY COT

FRUIT

Bright orange colour with red blush, sweet and juicy, 14 brix

RIPENING TIME

20/25/JUNE

FEATURES

Excellent gustative qualities, sweet and juicy fruit

SWIRED

FRUIT

Has a 3A-2A average size.

Oval shaped, elongated, but with a very attractive colour with intense red blush on almost half the fruit surface.

RIPENING TIME

LATE, 8/14 JULY

FEATURES

Beautiful color and excellent taste :
sweet and juicy

NECTARIENE

FRUIT

Homogeneous caliber 2A, round shaped.
Color: 80-90% red on a bright orange background

RIPENING TIME

27 JULY/ 3 AUGUST

FEATURES

Very good taste, aromatic sweet

BIG TOP

FRUIT

It is a big and durable variety, its shell color is dark red on orange background, it has a light tall structure and the fruit meat is yellow and delicious.

RIPENING TIME

3 -13 JULY

FEATURES

very sweet and aromatic, even if the fruits are not yet fully ripe

NECTAVANTOP

FRUIT

2A Calibre, homogeneous, shape: round
Color: fully bright red

RIPENING TIME

9/18 AUGUST

FEATURES

Excellent taste qualities, exceptional aromatic
semi-sweet flavour

PLUMS

BLACK SPLENDOR

FRUIT

Good calibre (60/70mm), round.
Brilliant red flesh colour with tender and
adherent texture

RIPENING TIME

1/10 JUNE

FEATURES

The flavor is juicy and sweet with good taste
Low in acidity

OCTOBER SUN

FRUIT

Very large calibre (50/55mm) round shape.
The flesh and skin are red brilliant colored,
very good firmness

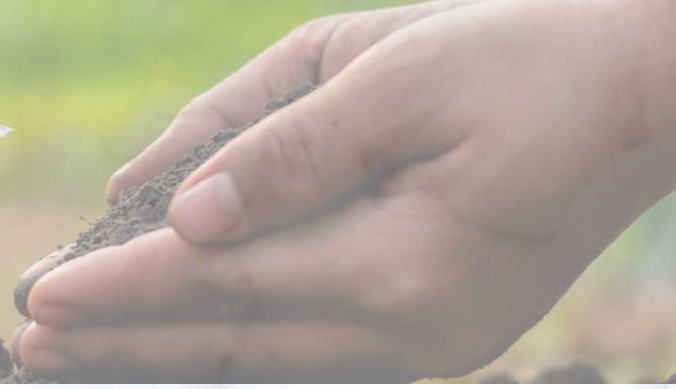

RIPENING TIME

15 SEPTEMBER

FEATURES

Excellent good gustative features

PEACHES

SAMANTHA

FRUIT

Fruit flesh is white, fruit is flat and round. Its color is attractive red.

RIPENING TIME

19 MAY

FEATURES

It has a balanced acid content and tastes quite delicious. Fruit is hard and durable
